

Performance Measure 1

Gender of Children Ages 0-5
July 1, 2004 through March 22, 2005
N=58

Ethnicity of Children Ages 0-5
July 1, 2004 through March 22, 2005
N=58

Performance Measures 2 & 4

Follow up Survey to measure Family Support, Child Well-Being and Resources Utilized *July 1 – December 31, 2004*

In the first six months of this contract period there were **68 interviews**. Of those interviews, **29 children** were between the **ages of 0-5** (43%).

Out of the 29 cases, **14 families were contacted and available** (48%) for the follow up survey. *Of the 15 not available:*

- 9 did not return messages left or no answer
- 2 of the children were placed in protective custody (CPS)
- 2 numbers were disconnected
- 2 families moved

The results from the 14 families were as follows: (regarding Post-Survey question #6) Since your child's interview at MDIC, describe the effect on their well being...

- 64% (9) described their child's well-being as positive
 - "They felt good about themselves after their interview at MDIC"
 - "...doing very well--showing no signs of trauma"
- 14 % (2) described their child's well-being as neutral
 - "MDIC opened the door for our child to disclose further abuse"
 - "They are up and down"
- The remaining 3 families described on-going custody issues, as well as one parent stating that their child is having nightmares associated with the abuse disclosed.

Responding to Post-Survey question #8, utilizing resources since the MDIC interview, **12 out of the 14 families had participated in some type of resource(s)**:

- The majority participated in child and/or family counseling (7), HOPES (3), CPS (2), CAPC Home Visiting, MIC, STEP, PEACE.

Responses to Post Survey questions #9 regarding how **parents felt after their child's interview** were as follows:

- Somewhat to very comfortable 64% (9)
- Somewhat to extremely uncomfortable 29% (4)
- Other (1) did not want to participate

MDIC 2005

Responses to Post Survey questions #10 regarding how **children felt after their interview** were as follows:

- Very comfortable 74% (10)
- Somewhat to extremely uncomfortable 14% (2)
- Other (1) did not want to participate and (1) child was "afraid"

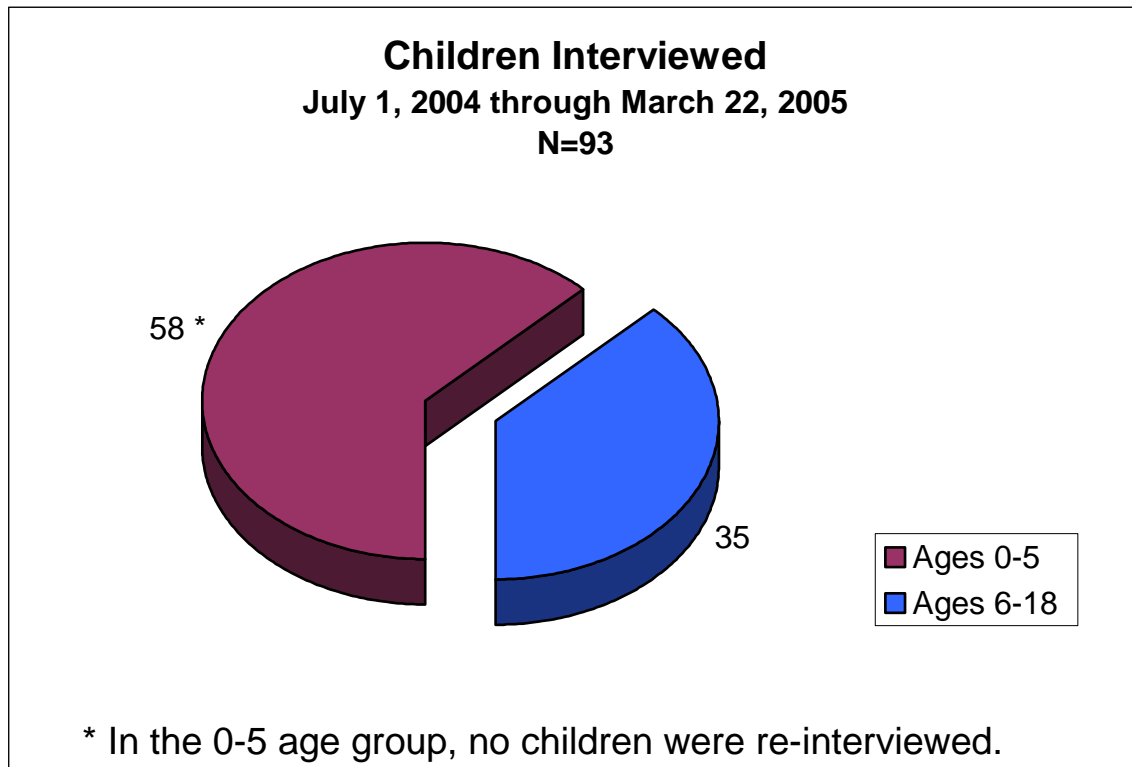

Data that speaks most directly to the outcomes at MDIC:

- Children and families feel supported and less traumatized while going through with the initial disclosure process at MDIC as evidenced by the post surveys regarding the parents and children
- The MDIC Team is sustaining as evidenced by meeting attendance and discipline/agency participation

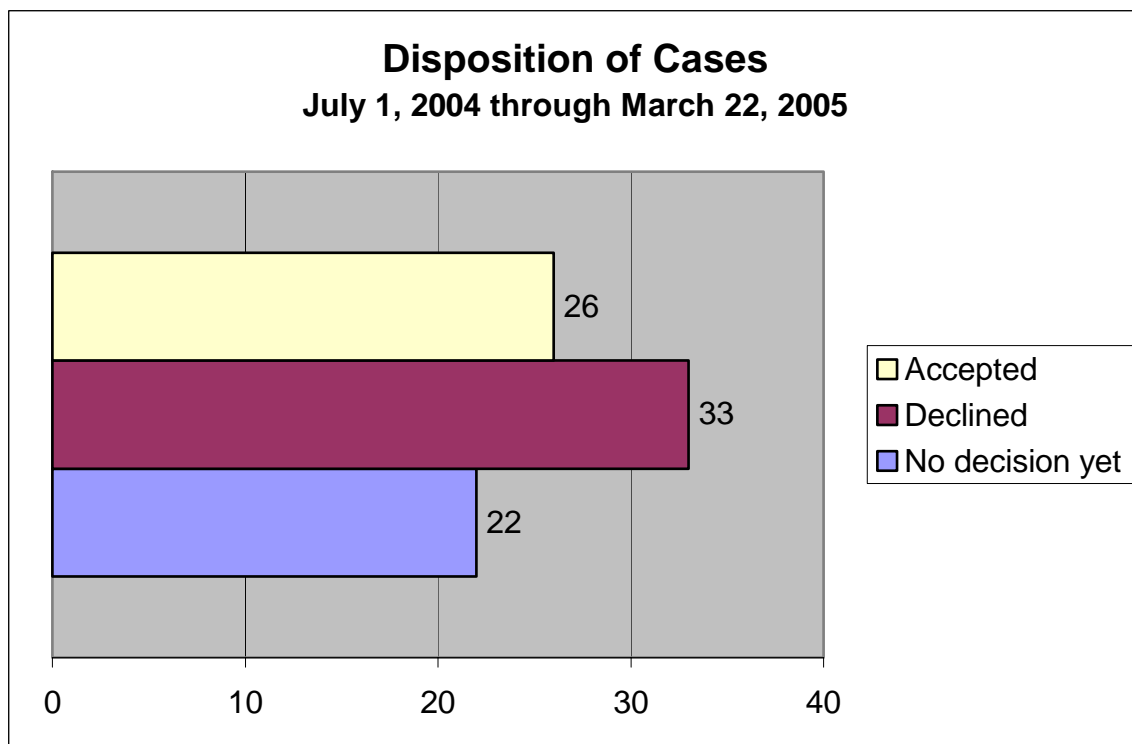

Lessons learned:

- Rarely do families participate in VOC applications
- Very few families seek counseling for their child or family
- It would be helpful to develop an evaluation tool for the children after their interview...parents not always aware of the child's emotions/well-being
- Very few families are ready to hear about enrichment services due to present crisis...they say they want counseling
- Children feel very comfortable and supported for their disclosure at MDIC
- Children are not re-traumatized at MDIC evidenced by no "re-interviews"
- Families feel supported at MDIC but later feel frustrated by the system once they leave
- Follow up should be after one month rather than at end of first half of contract
- Monthly team meetings and trainings are very well attended
- The MDIC Team appears to be sustaining despite turn-over
- Performance measures should include pre- and post surveys (now are)
- It is time consuming to do follow up with families but very needed
- Outcomes Screens are continued to be used yet probably not effective with this program
- The commitment is strong by both the Team (meeting with families after the interview) and personnel assigned to attend interviews (Victim Witness) as well as the investigators (ACCESS, Law Enforcement, District Attorney, County Counsel)
